

Business to Government Forum

27 September 2017, IFAT India 2017, Mumbai

Circular Economy & Smart Resource Management

IFAT India is India's leading environmental trade fair for water, sewage, refuse and recycling. It will be an ideal platform for successful networking with representatives from the industries and municipal sectors. Exhibitors and visitors were equally satisfied and confirmed the importance of this trade fair for the highly promising market.

With growing urbanisation, industrialisation and steady population growth, there are urgent needs for investment in waste management, water and wastewater infrastructure in India. The aim of the forum is to provide Indian states an important platform to showcase their Urban development initiatives, programmes and activities planned under the Swachh Bharat Mission (Clean India Mission) and Smart Cities Mission. This platform will also give them an opportunity to interact with international experts, technology providers as well as institutions and government representatives.

With a strong focus on solid waste management, water and wastewater as well as air pollution technologies IFAT India shall give cities and states the needed platform to present their upcoming projects, programmes, new tenders, issues, challenges, and opportunities in the urban sector development. The forum is organised by Indus Media with the support of IFAT India and GIZ India.

Join in the dialogue!
