

Air Quality Management (AQM) has drawn attention of the Policy makers, Regulators, City managers and Industries at the National, State as well as City level. The Urban areas and industrial sector are significant contributors of air pollution. Notified industry emission regulations and National Ambient Air Quality Standards have an important role to play in improving air quality. The authorities have issued stringent directives for automated monitoring to Industries and Urban Local Bodies (ULBs).

Unfortunately, there has been little progress or accomplishment on the ground and the air pollution levels in cities and around industrial estates has been found at alarming levels. Poor understanding and weak institutional capacities is one of the major bottlenecks. In order to bring the issue under the spotlight, **SDG-Foundation** has joined hand with **IFAT India** to organize a workshop on Air Quality Management on **27 September 2017 in Mumbai**.

The workshop will bring together Policy makers, Regulators, City managers and Industries to discuss and to share technologies, knowledge and experience on the AQM. The idea is to provide an all round perspective on the AQM to Industry and Cities to allow them to take an informed decision on actions for their AQM Plans.

Registration

You can register on - <http://ifat-india.com/register> just tick the box of Air Pollution under **I would like to attend the supporting program on these topics**. There is no registration fee but registration is mandatory. You will be issued entry pass on arrival at the exhibition venue – Hall 5, Bombay Exhibition centre, Goregaon East Mumbai.

Expert Speakers

1. Dr. P. Anbalagan, Member Secretary, Maharashtra State Pollution Control Board
2. Dr. Meinolf Druieke, State Agency for Environment, Nature Conservation & Geology, MBUB, Germany;
3. Dr Prasad Modak, Environment Management Center, Mumbai
4. Dr Gufran Beig, Indian Institute of Tropical Meteorology, Pune
5. Dr. V. M. Motghare, Joint Director (Air), MPCB
6. Shri S. K. Gupta, Director, Envirotech Instruments Pvt. Ltd. And
7. Shri Sudheesh Narayanan, CEO, Knowledge Lens

Advantages

- Platform for connecting with experts and regulators.
- meet and greet with Industry, ULB, consulting and academics
- Opportunities to generate new leads and obtain feedback.

Participant's profile

- ✓ Environmental Managers of industries
- ✓ Professionals working in the environment consulting
- ✓ Professors/Researchers/Students
- ✓ monitoring instrumentation suppliers

Organizers

SDG-Foundation is a Strategic Think Tank to enhance the global partnership and provide a platform for the scientific expertise and technological advancement for Sustainable Development.
